## 心得:

這次的 call by value、call by address 是一個很重要的課題,這告訴我們,副程式跟主程式之間並沒有 direct connecting 所以如果要透過副程式更改主程式的的內容的話要透過 address,而在本次的作業裡面,在要把輸入的字串顛倒輸出時,遇到最大的問題就是如何辨別字串的長度,後來經過詢問瞭解到\0 的使用技巧,經過熟練之後感覺得心應手。
